How to use Parlay of the Day

Parlay the Parrot runs this desk. This page shows every button worth knowing, where it is, and what you get when you tap it. Anything circled in **yellow** in a picture is the thing to tap.

1 The parrot in the corner

"Tap me. I'll show you something you haven't tried yet."

The parrot sits in the top right corner. Leave the page alone for a bit and a speech bubble pops out next to him with a tip you have not used yet. Tap the bubble and he takes you there, or lights up the button he is talking about.

Once you use something, he stops bringing it up. When you have tried everything, he goes quiet.

Top right: the parrot and his tip. Bottom right: your profile button.

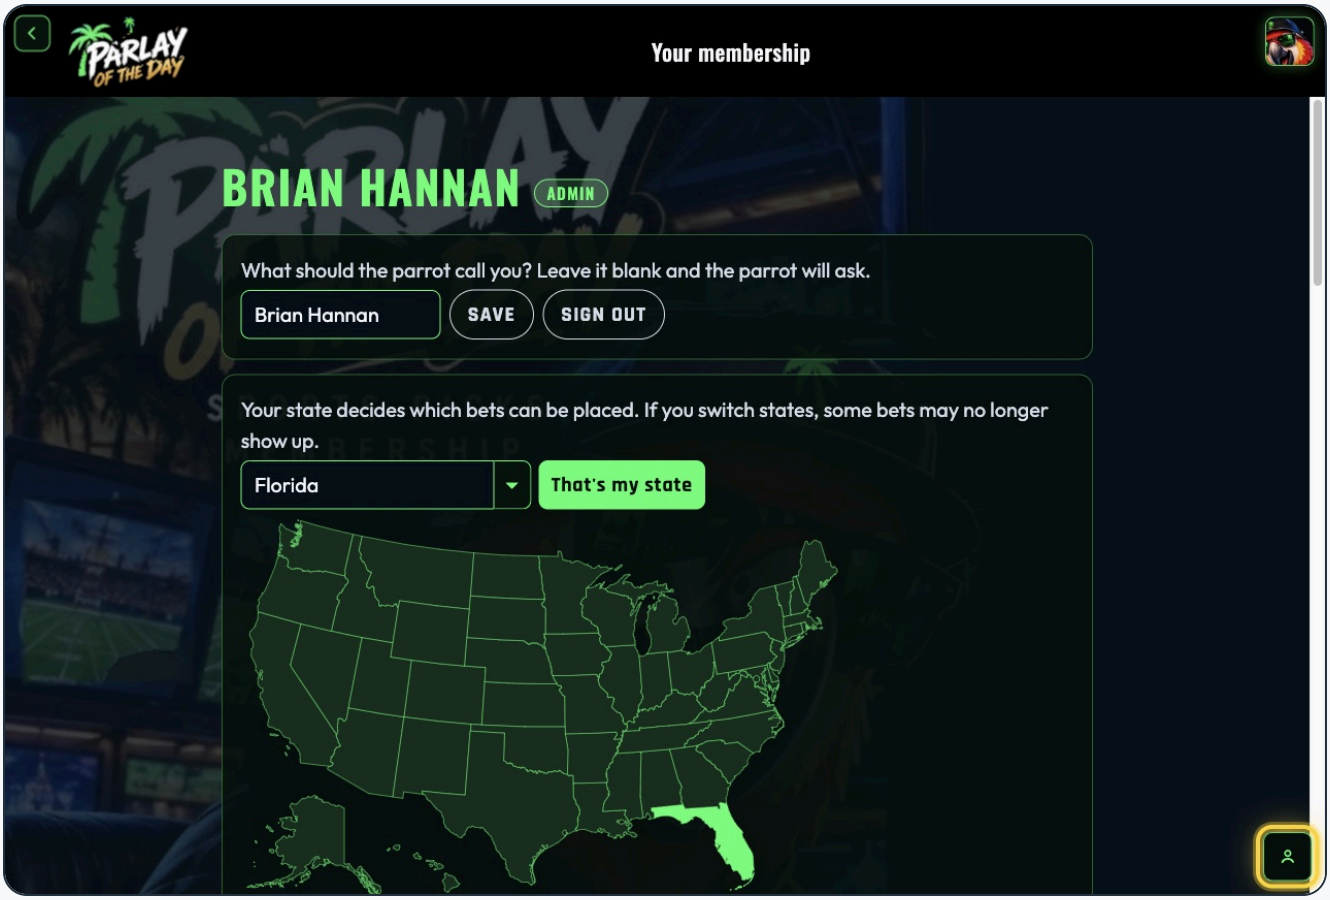

On a phone, tap the bubble once to read the whole tip, then tap it again to go.

2 Your profile

"Tap the little person in the corner. Your record and your settings live in your profile."

The person button sits in the bottom right corner, next to your name. Tap it to open your profile. Tap it again to go back to the desk.

- **Your name**: what the parrot calls you.
- **Your state**: the desk only shows bets you can place where you live.
- **Your sportsbook**: the book you bet with.
- **Your teams**: so Recommended on the home screen can show only your teams' games.
- **Your friends**: the people you can send bets to.

Your profile. The person button stays in the corner on every screen.

3 Share the site with a QR code

"Double-tap me and I'll put a QR code on the TV. Your friends scan it and they're in."

Double-tap the parrot in the top right corner. A QR code fills the TV. Anyone in the room points their phone camera at it and lands on parlayoftheday.com. Tap anywhere to close it.

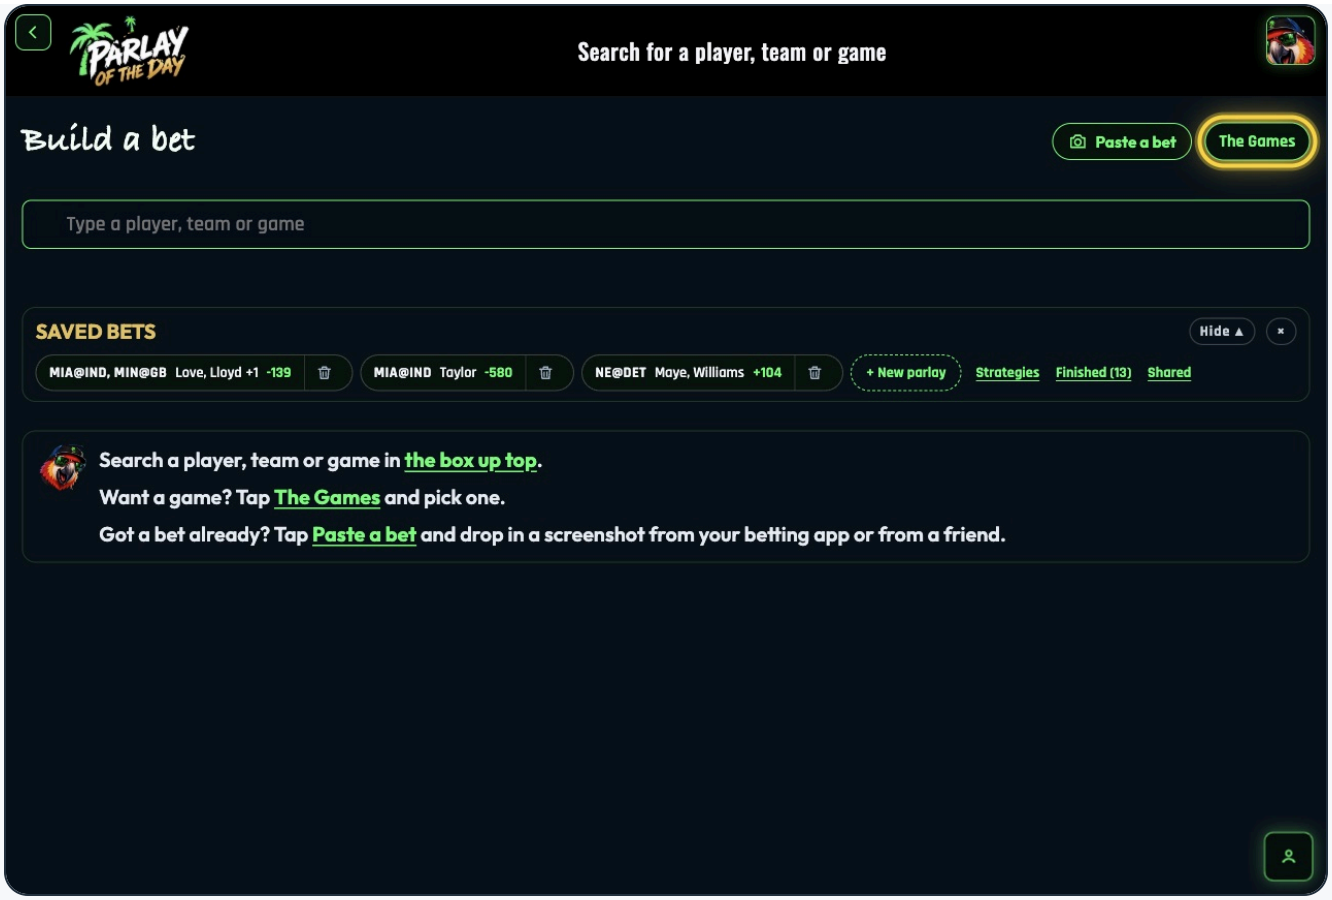

Double-tap the parrot and the QR code shows up on the TV.

4 Find the games: today and this week

"Every game today and this week is on The Games. Tap here and I'll take you."

On Build a bet, tap **The Games** in the top right. You can also tap **The Games** on the parrot's first screen.

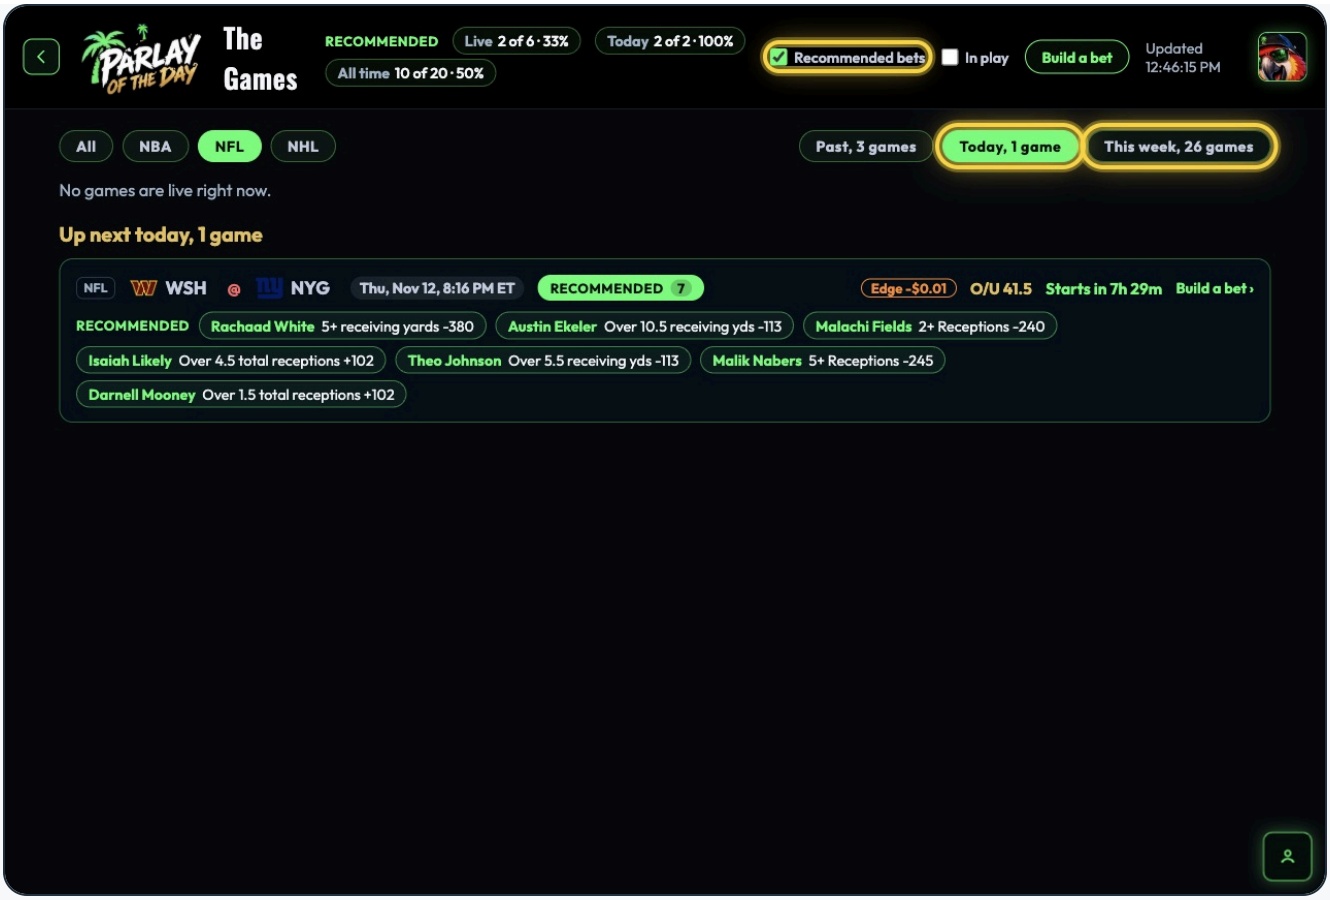

The Games button, top right of Build a bet.

The Games has three tabs on the right:

- **Past**: games that are over, with how the recommended bets did.
- **Today**: every game today, with scores live while they play.
- **This week**: everything coming up this week.

The league buttons on the left (All, NBA, NFL, NHL) narrow it down. Tap **Build a bet** on any game to start a bet on it.

Today and This week sit on the right. The Recommended bets switch sits at the top.

5 Show or hide Recommended bets

"On The Games, flip on Recommended bets and my picks show up on every game."

At the top of The Games, check **Recommended bets**. Every game the parrot likes gets a green **Recommended** tag and a row of his picks under it. Tap a pick to open it in Build a bet. Uncheck it to hide them and just watch the scores.

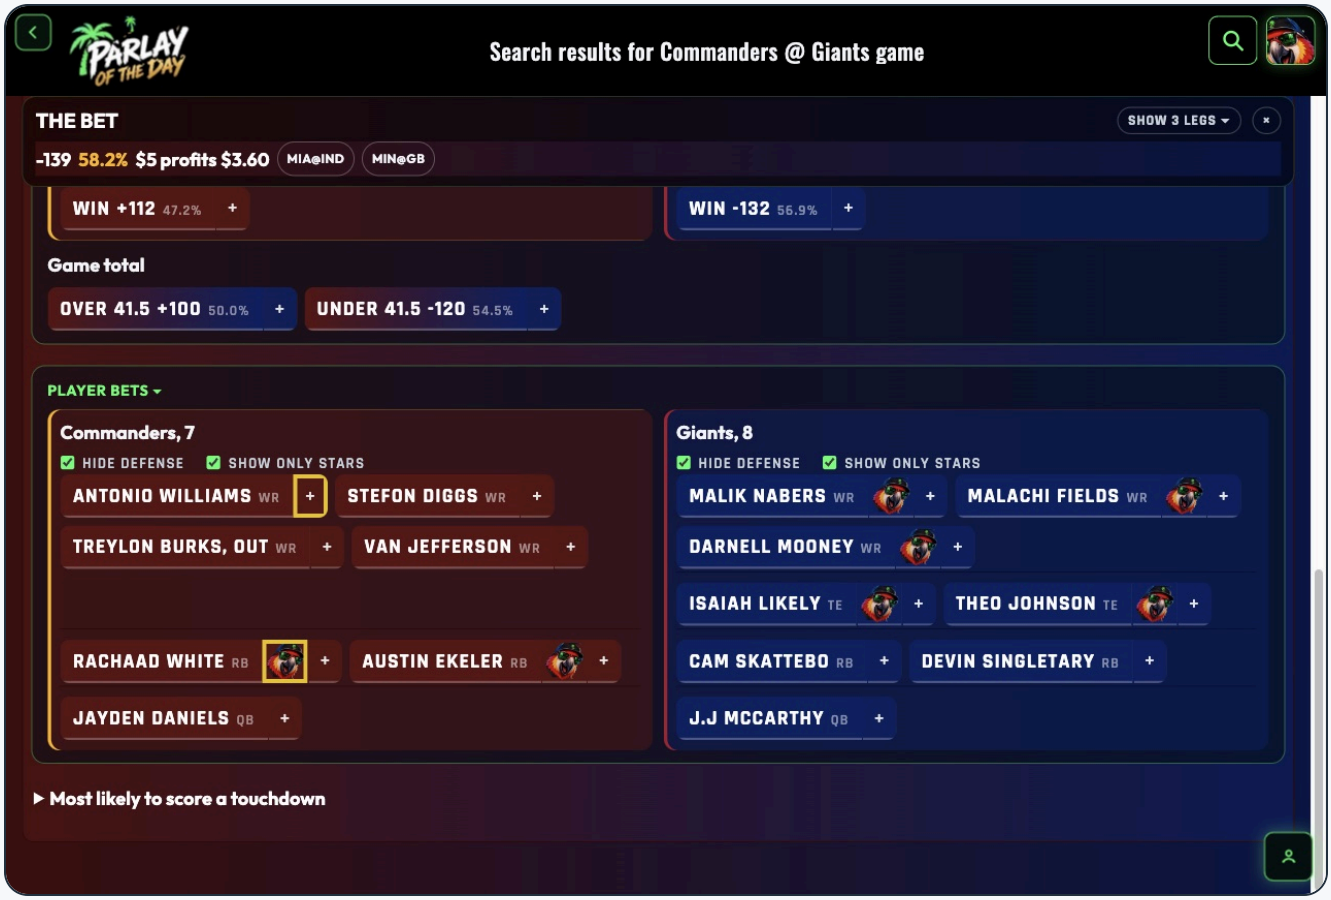

The scoreboard next to it keeps his record: how his picks are doing live, today, and all time.

See the picture in section 4: the checkbox is circled at the top.

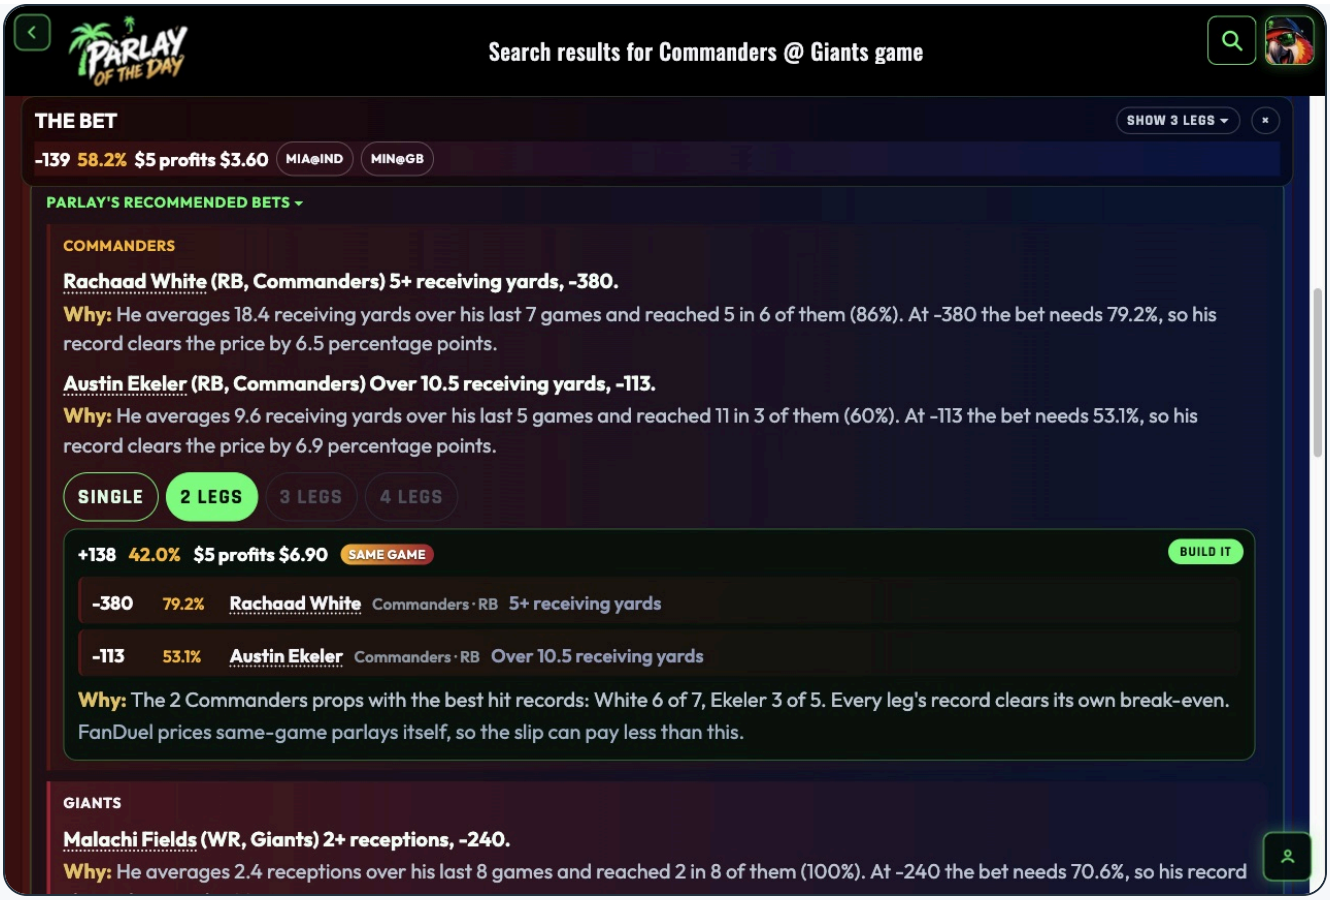

6 The parrot icons on players

"See my face next to a player? Tap it and I'll tell you why I like him."

Open any game in Build a bet. Under **Player bets**, the players the parrot recommends have a little parrot face next to their name. Tap it to jump to his pick for that player, with the reason, the price, and what the record has to clear.

The parrot icon next to Rachaad White, and the + next to Antonio Williams.

What you get: the pick, the reason, and a ready-made parlay you can build with one tap.

7 The + button on players

"Tap the + on a player to throw him in your bet now. Pick his prop later."

Every player in a game has a **+** next to his name. Tap it and he goes into THE BET right away, before you pick a prop. The + turns into a check mark. Tap it again to take him out.

When you are ready, tap his name in THE BET to choose the prop (see section 8).

8 Change a leg in THE BET

THE BET is the bet you are building. Every leg in it can be changed right where it is.

Tap the name to change the prop

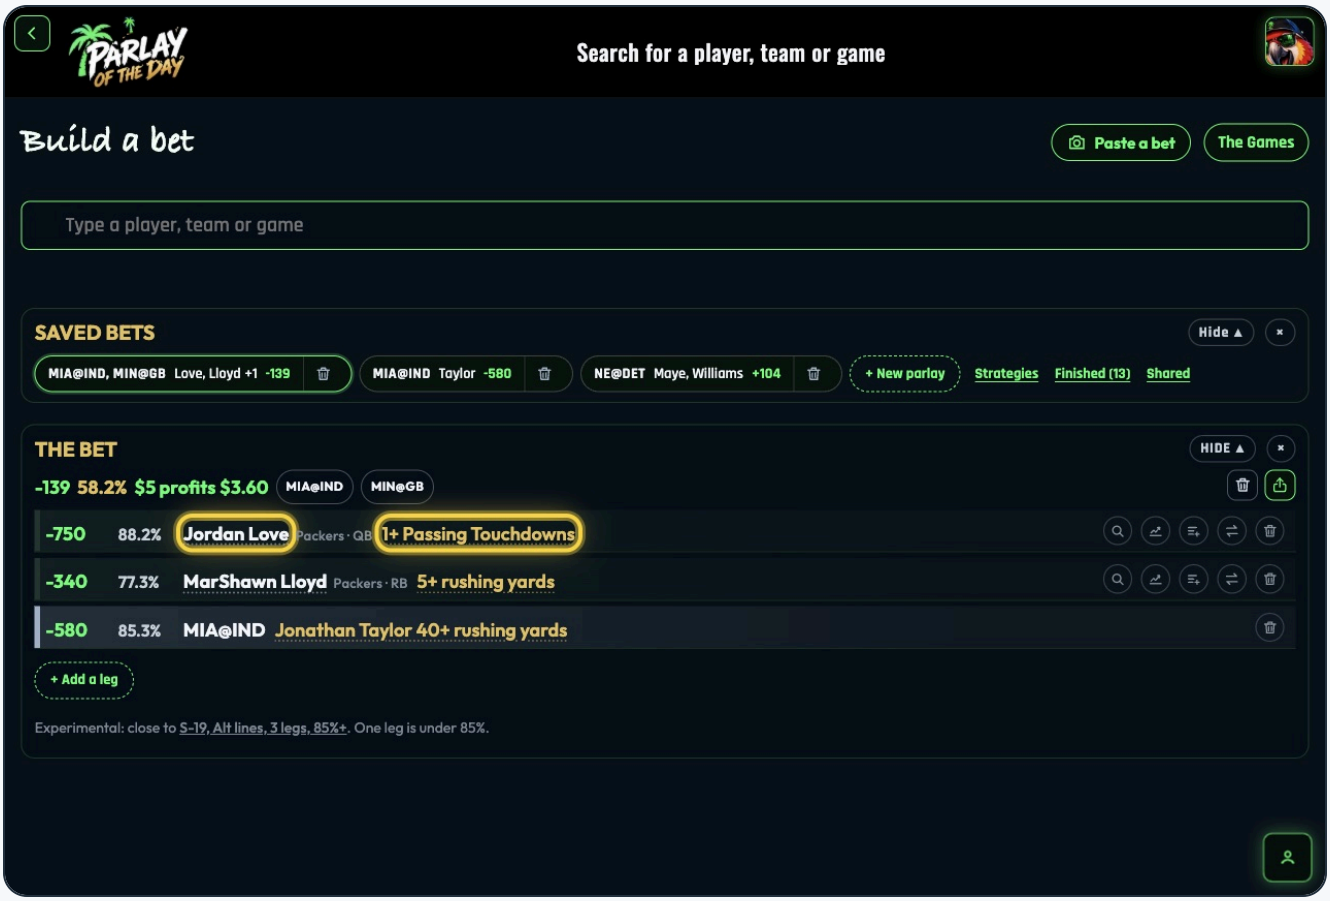

"Tap a player's name in your bet to swap him to another prop."

Tap a player's name and every prop he has comes up: yards, receptions, touchdowns, and more. Tap one to swap it in.

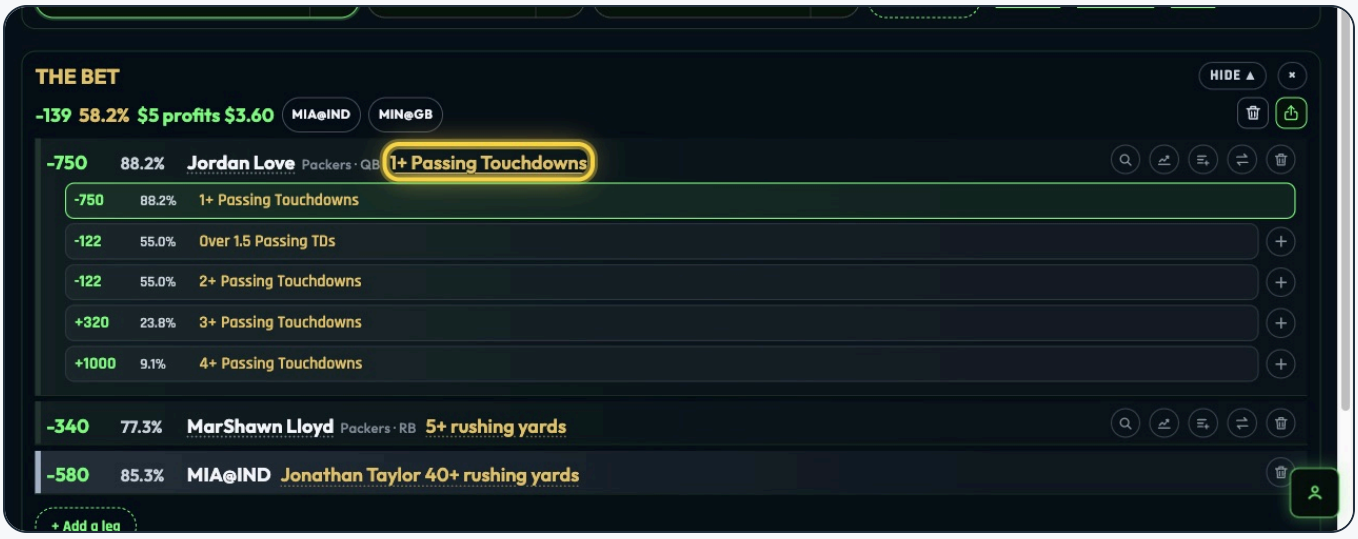

Tap the prop to change the number

"Tap the prop in your bet to move the number up or down."

Tap the prop (the gold words) and the other lines come up with their prices and chances. A lower number hits more often and pays less. A higher number pays more.

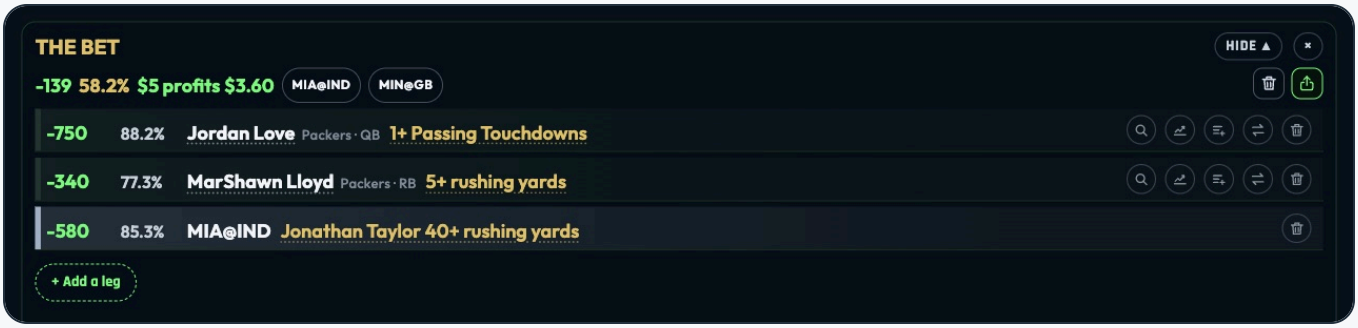

Tap the name to change the prop. Tap the prop to change the number.

Tapping "1+ Passing Touchdowns" shows 2+, 3+ and 4+ with their prices.

9 The leg buttons: trends, swaps, move, search

Every player leg has a row of small buttons on the right. On a phone, tap ⋯ to see them.

From left: search, trends, add to another bet, swap. The trash can removes the leg.

Magnifier: search
Pulls up everything on that player: every prop, every game.

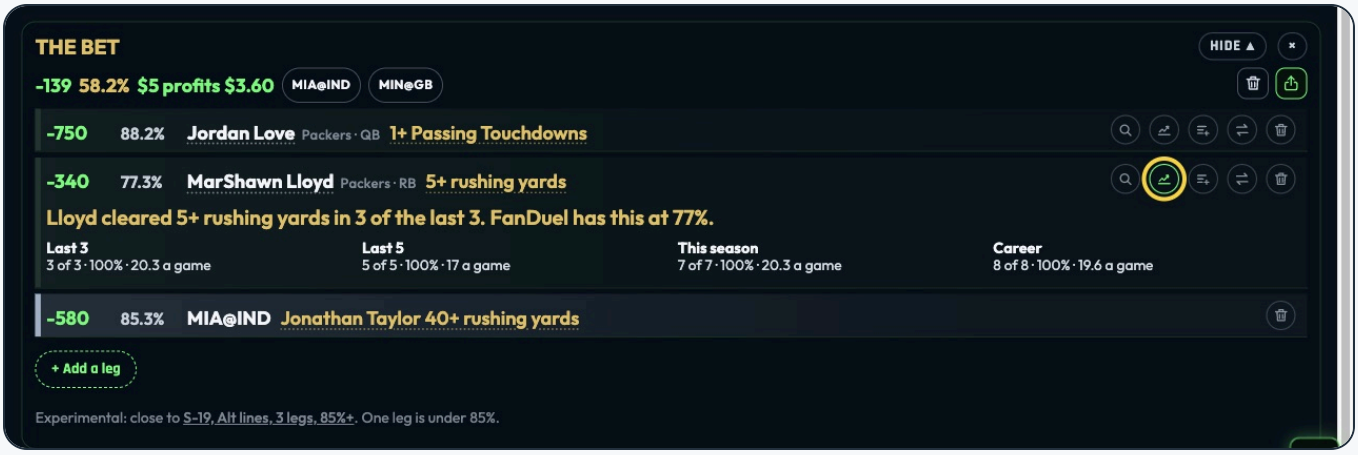

Chart: trends
How often he has cleared this exact bet in his recent games, this season, and his career.

List: add to another bet
Puts this leg into another of your saved bets too.

Arrows: swap
Other bets at about the same price, if you want a different player.

Trends

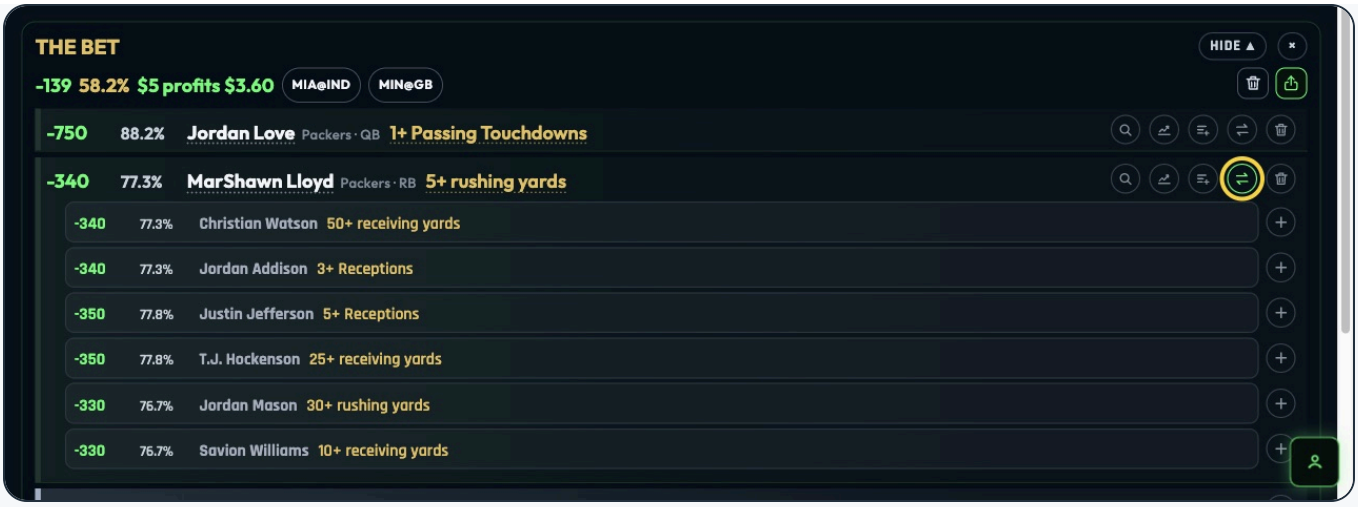

"Tap the chart on a leg to see how he's done in his recent games."

Lloyd cleared 5+ rushing yards in 3 of his last 3 and 7 of 7 this season.

Swap

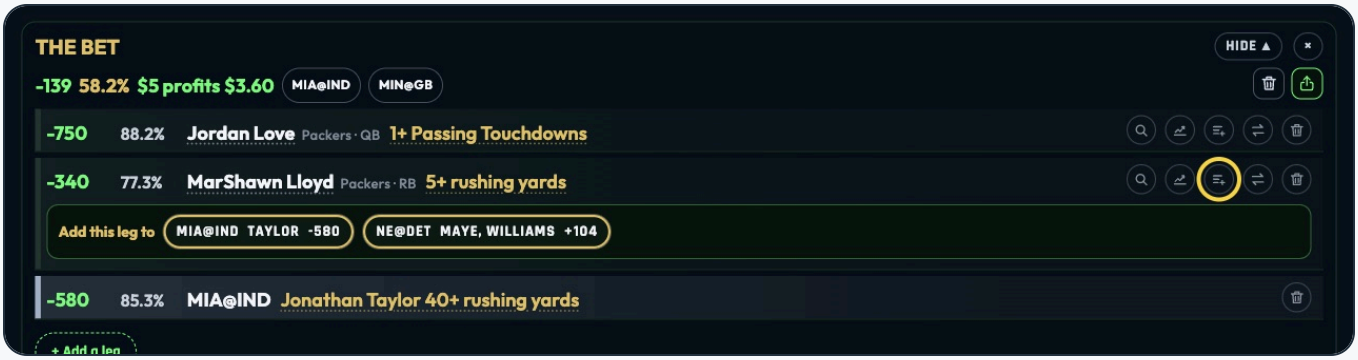

"Tap the arrows on a leg and I'll find other bets at the same price."

Tap + on any of them to put it in your bet.

Add to another bet

"Tap the list button on a leg to put it in another saved bet too."

Pick the saved bet you want it in.

Search

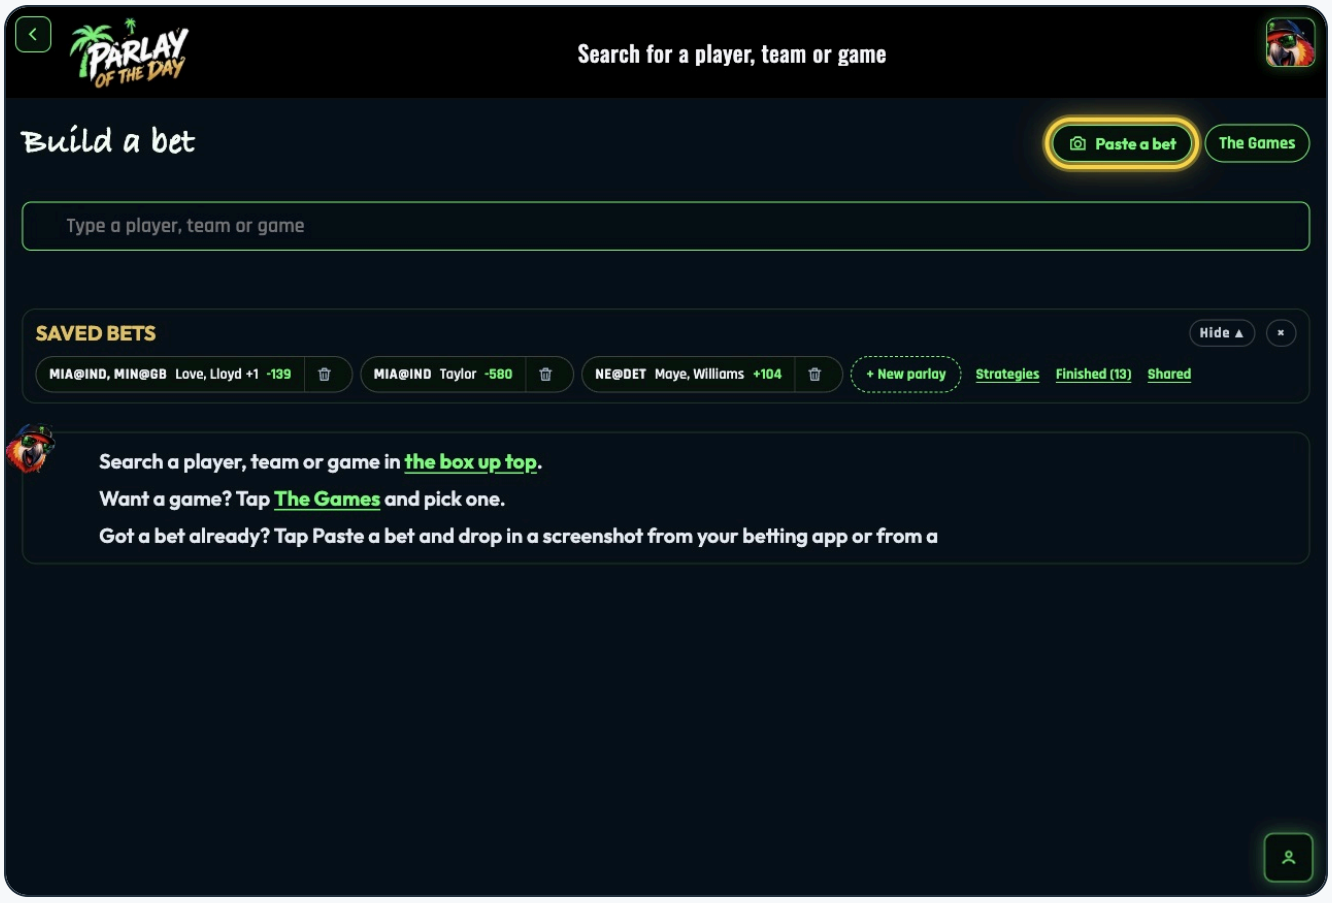

"Tap the magnifier on a leg to pull up everything on that player."

10 Paste a friend's bet from a screenshot

"Friend sent you a screenshot of a bet? Tap here, paste it, and I'll build it for you."

- Copy the screenshot (from a text, a group chat, or your betting app).
- On Build a bet, tap **Paste a bet** at the top right.
- Paste it (⌘V on a Mac, Ctrl+V on Windows), or tap **Choose a file**.

The parrot reads the legs and builds the bet in THE BET, ready to change, check, or share.

Paste a bet sits next to The Games.

11 Send a bet to a friend

"Tap the share arrow on your bet to send it straight to a friend."

- Tap the share arrow, the green box at the top right of THE BET.
- Your bet turns into a card on the TV.
- Tap **Send to a friend**, check the friends you want, add a note if you like, and tap **Send**.
- Or tap **Copy** to paste the card into a text or a post.

Your friends see it under **Shared** in Saved bets. To add friends, open your profile.

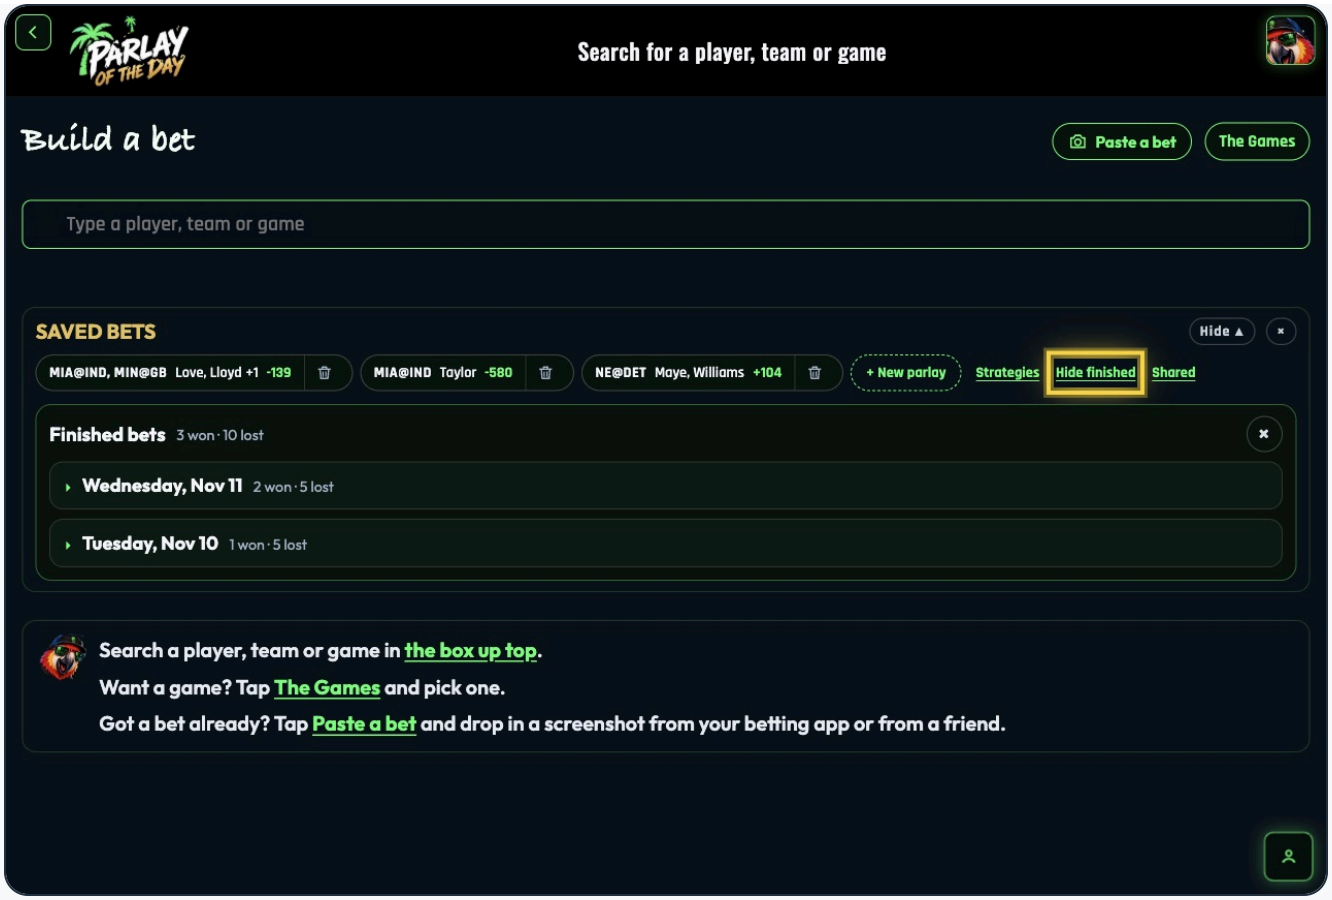

The card your friends get, with Send to a friend circled.

12 Look back at how your bets did

"Want to know how your old bets went? Tap here and I'll show you what hit and what missed."

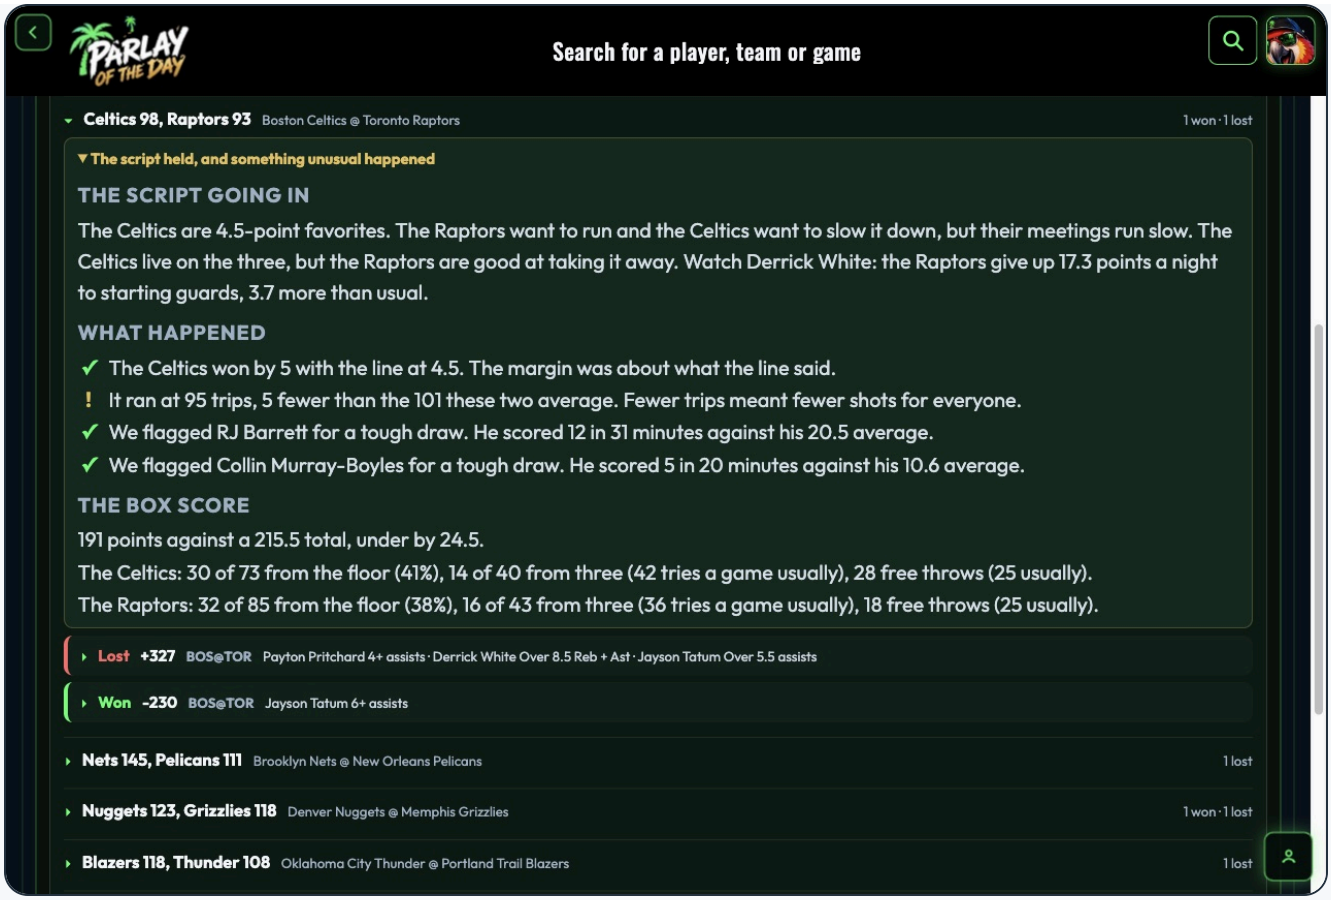

Your bets

On Build a bet, under Saved bets, tap **Finished**. Your settled bets are grouped by day and by game.

Finished bets, grouped by day, with wins and losses.

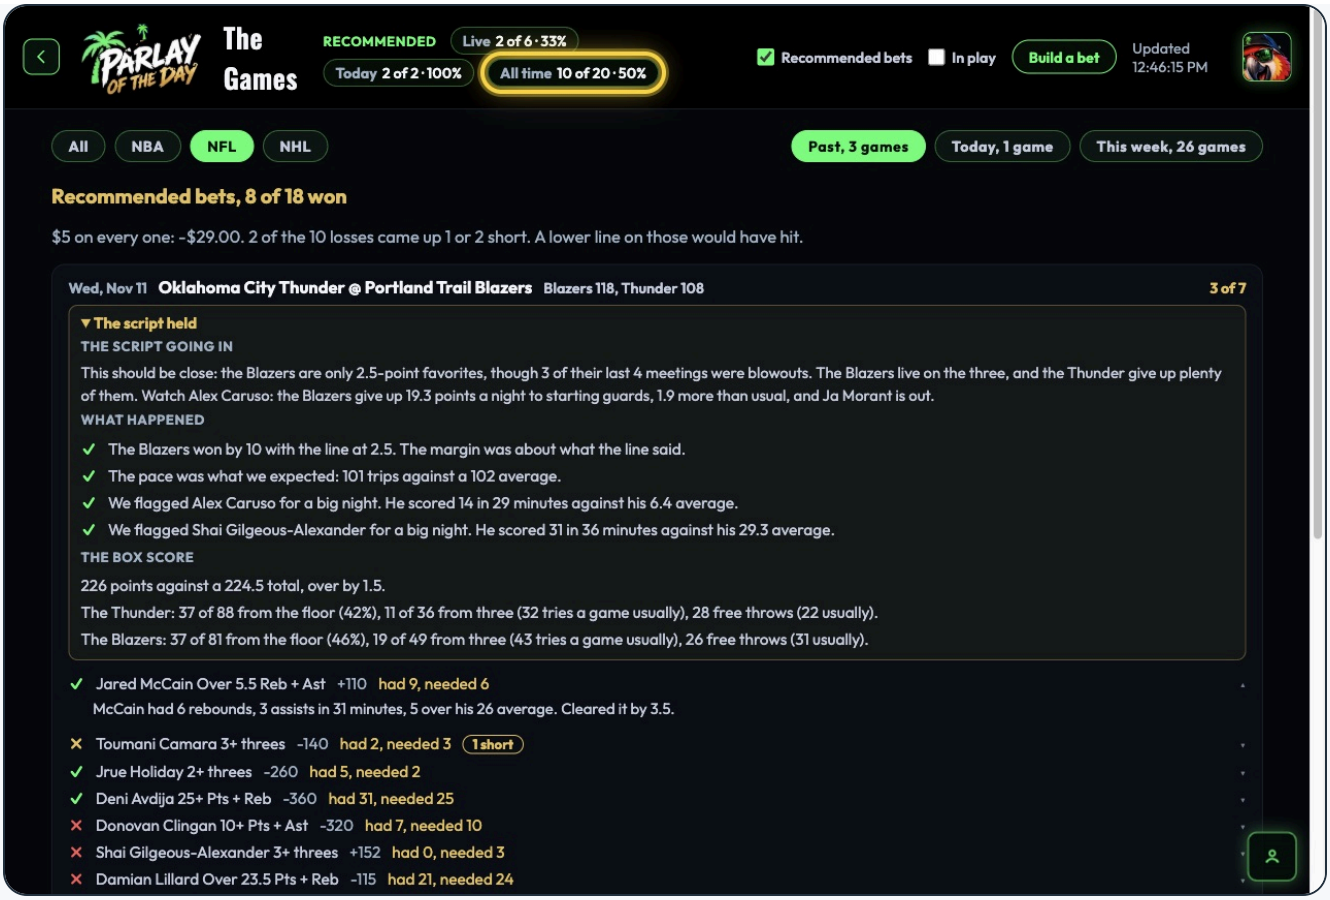

Open a game to see the whole story: what the parrot expected going in, what actually happened, the box score, and why each leg hit or missed.

The script going in, what happened, and the box score.

The parrot's picks

On The Games, tap **All time** in the scoreboard at the top. You get every game the parrot recommended. Each pick shows what the player had against what the bet needed, and a gold **1 short** tag marks the near misses. Open a game for the full review, and tap any pick for why it hit or missed.

All time: every recommended bet, how close it came, and why.

21+. This desk does not send bets. Type a line into your own sportsbook account if you want it. Gambling problem? Call 1-800-GAMBLER.
